Working Prototype Known Problems Report

Product Name: Dave
Team Name: Dave

Personnel: Kenneth High – Product Owner
                 Eunika Wu
                 Cyrus Farsoudi
                 John Wilde
                 Alec Reid

Known Problem:
- The parser "Stanley" cannot tell if a script is properly formatted and it cannot tell if a file feed in to is actually a script. It just takes it on faith. And god willing,
- The web-scraper "Discovery One" can only scrape html file and not pdfs. In addition it can only scrape scripts form IMSDB.com.
- The generator "Hal" output is sometime nonsense and doesn't have proper grammar.
- Dave sometimes get hung on certain strings.
- Has problem with processing large scripts.
- Pdf writer was having a problem integrating with Dave so we had to drop it. This would be resolved in sprint 4.
- Prints several block of data dialog in succession
- We have print error blame cyrus.
